

TYPE P2BPTAGFP AUTOMATIC CONTROL BOX

IP65 - D.O.L. Starters for 0.5-4.5HP Three Phase Pumps

For dirty water and sewage applications.

Designed for the control and running of 400V three phase pumps, offering protection against dry running and motor overload. Suitable for submersible pumps with motor sizes up to a nominal 13 Amps.

MODEL	AMPS MIN/MAX (Ranges)	DIM. CM H x W x D	WEIGHT KG
P2BPTAGFP	1.6/13.0 <small>1.6-2.5 / 2.5-4 / 4-6 / 5.5-8 / 7-10 / 9-13</small>	50 x 30 x 22	11.3

OPERATION

In operation, the level control system utilises float switches operating on 24Vac. Normally three float switches are required; one upper (high level alarm), one middle (start) and one lower (stop).

TYPICAL SUMP EMPTYING APPLICATION

When the sump liquid level rises, it triggers the middle or 'start' float switch. As the liquid level falls to the set point, it triggers the lower float switch, turning the pump off. If for any reason the pump does not start and/or the liquid level rises to the top float switch, the audible alarm is triggered and the alarm indicator light on the panel is illuminated.

As a guide, it is recommended that the pump cycle should not be repeated more than 6 times per hour. In a filling application, the cycle is simply reversed.

FEATURES

BOX: Strong thermoplastic enclosure (IP65) hinged to left hand side and double locks to right. Clear thermoplastic front panel. 4 x wall mounting brackets

INNER STEEL HINGED LID:

- Amber Light = Mains supply.
- Green Light = Pump running.
- Upper Red Light = High level alarm.
- Lower Red Light = Thermal cut-out.
- Lockable Door Interlocking Isolator: Isolates power when inner lid is open.
- Hand-Off-Auto Switch.
- Audible alarm buzzer.
- Alarm on/off switch.

INTERNALS: 50VA Transformer: To reduce 230V supply to 24Vac for level control safety.

Plug-In Relay: For level controls.

Contactor with Overload: Manual setting for pump running Amps.

Fuses: Fuse holders with HRC fuses on mains and auxiliary circuits.
